## **DAISEIKAI 10 from Toshiba Air Conditioning Helps Bring Sustainability and Natural Beauty to Homes in Europe**

**LONDON, Nov. 27, 2023** – Toshiba Air Conditioning is unveiling its DAISEIKAI™ 10, bringing new levels of sustainability, sleek design and performance to home comfort across Europe. Toshiba Air Conditioning is a part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

First available in Nordic countries, Toshiba Air Conditioning is now introducing a version of its DAISEIKAI10 to suit average and warm climate conditions across Europe.

The new aesthetic of the DAISEIKAI derives from its material concept – “Go back to the Earth.” Its natural wood grille, sourced from PEFC-certified sustainable forests, makes the product unique in the air conditioning and heat pump market. Every natural wood grille with its own grain, texture and colour tone makes the DAISEIKAI 10 bespoke to each home, while a timeless white panel is also available for homeowners replacing existing air conditioners. Furthermore, recycled materials make up 43% of DAISEIKAI 10’s plastic components.

In addition to its best-in-class A+++ energy rating in cooling and heating, and ultra-quiet indoor unit operation, the DAISEIKAI 10 boasts several intelligent features to elevate homeowners’ lifestyle, such as multiple controller solutions including a luxury remote control, Wi-Fi/app, and smart speaker voice control, motion tracking function and plasma ionizer complete with an ultra-pure filter PM 2.5 and a coated coil.
