**Toshiba Carrier Teams Up with Habitat for Humanity Japan  
to Prepare Land for Playground at Children's Home**

**KAWASAKI CITY, Japan, March 8, 2024** - [Toshiba Carrier Corporation](#) (TCC) partnered with Habitat for Humanity Japan (HFHJ) to help level the ground for a future playground at Kodomo no Sono, a children's home situated in Chigasaki City, Kanagawa Prefecture, Japan. TCC is a part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

This marked the second occasion for TCC to participate in a community event with HFHJ. A total of 24 volunteers from TCC braved the cold weather and with tools in hand, removing overgrown weeds and shrubs to help prepare the land for the playground. The volunteers also made sure that uprooted weeds and shrubs would be dried and pulverized into compost so that they would eventually go back to the earth.

"We are privileged to join forces again in such a great project launched by HFHJ. The ground leveling work was a lot more challenging than we expected but we all felt rewarded when we saw the children's smiles at the facility," said Toru Kubo, President of HVAC Japan, Carrier. "What we accomplished is a very first step for this project and we will provide further support going forward."

HFHJ started its initiative to build a playground for children who reside at the home as well as other local children to enjoy. The future outdoor space will provide the young people with opportunities to meet and interact with one another. Inspired with the idea behind the initiative, TCC is committed to extending its support to it.

"This project is an essential part of our efforts to give back and help advance the communities in which we live and work. The event was a very meaningful day for all participants including myself, as we could contribute to make this place better for the children," said Amit Maheshwari, Director, Sales Marketing & Strategy, Carrier HVAC Asia Pacific.
