## **Carrier Brings Purpose to Life Through Facility Improvements at Children’s Home in Chigasaki, Japan**

**TOKYO, June 5, 2026** – Volunteers from Carrier recently participated in facility improvements organized at the children’s home “Kodomo no Sono” in Chigasaki City, Japan, in collaboration with Habitat for Humanity Japan (HFHJ). Marking the fifth time this initiative has been conducted, employees participated in the activities, including planting a symbolic Japanese stone oak tree in the terrace, putting the finishing touches on playground equipment with fresh paint, and adding greenery along the adjacent fence to enhance the surrounding environment. [Carrier Japan Corporation](#) is a part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

This initiative is part of a multi-year project launched by HFHJ to enhance outdoor spaces where children from the home and the surrounding community can play, connect, and grow together. Inspired by this effort, Carrier has committed to ongoing support, with volunteers contributing across successive phases of development. Building on earlier contributions by Carrier volunteers—including clearing and preparing the land, constructing a brick oven and camping area, and planting trees—these spaces continue to evolve into a welcoming environment that fosters interaction among young people and encourages broader community engagement. As the project approaches its final stage, a ceremony celebrating its completion is scheduled for June 27, with Carrier members in attendance.

“Each time we return, we are inspired by how the outdoor space continues to evolve,” said Mineo Maruyama, President of Carrier Japan. “Seeing volunteers come together toward a shared goal is a powerful reflection of Carrier’s purpose – *Enhancing the Lives We Live and the World We Share* – in action. We remain committed to supporting the growth of future generations and strengthening the communities where we live and work through these initiatives.”
